Portfolio

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in AIML with solid understanding of Data Structures, OOPs, and system design. Experienced in developing full-stack applications, RESTful APIs, and microservices-based systems with real-world use cases. Worked on projects involving distributed systems, simulations, and machine learning pipelines. Looking for Software Engineering internship opportunities to build scalable and efficient systems.

EDUCATION

- B.Tech in Computer Science and Engineering (AIML)**, VIT-AP University, Andhra Pradesh 2024 – Present
CGPA: 8.77 / 10.0
- Higher Secondary Education**, Krishna Reddy College, Vijayawada, Andhra Pradesh 2022 – 2024
Percentage: 95.1 / 100

SKILLS

- Programming Languages:** Python, Java, C++, SQL, JavaScript
- Frontend & Backend:** React.js, Node.js, Express.js, REST APIs
- Core CS Concepts & ML:** Data Structures & Algorithms, OOPs, DBMS, System Design, Scikit-learn
- Developer Tools:** Git, GitHub, VS Code

PROJECTS

RideShield | React.js, Node.js, MongoDB, RabbitMQ, Stripe, Redis |

In Progress

- Engineered a full-stack microservices-based insurance platform enabling automated claim processing through event-driven workflows.
- Developed scalable backend services with Node.js and Express, designing RESTful APIs for policy management, user operations, and payout handling in a modular architecture.
- Implemented asynchronous inter-service communication using RabbitMQ, ensuring reliable, decoupled processing across distributed services.
- Built a dynamic React.js frontend and integrated database & caching layers (MongoDB, Redis) along with simulated third-party services (Stripe/APIs) to achieve a robust end-to-end system.

Cosmic Explorer | JavaScript, APIs, Indexed DB | (Live Demo)

Aug 2025

- Built a 3D orbital simulation system for real-time trajectory computation and ΔV optimization using physics-based modeling.
- Developed and integrated RESTful APIs to process mission datasets and enable dynamic trajectory calculations.
- Implemented an offline-first architecture using IndexedDB for persistent mission tracking and improved reliability.

GitHub Profile Analyzer | API + Data Visualization | (Live Demo)

Nov 2025

- Developed a real-time analytics dashboard using GitHub APIs to track repository activity and developer contributions.
- Implemented asynchronous API handling with rate-limit management to ensure efficient and scalable data fetching.
- Processed and analyzed repository data to generate actionable insights on developer activity and contribution patterns.

POSITIONS OF RESPONSIBILITY

Co-Founder — (CollegePrep.page)

Co-founded and scaled an EdTech platform serving 2500+ registered users and a 4000+ member community. Contributed to platform development and optimization, enhancing usability and supporting scalable growth.

- Team Lead – Hackathon:** Led frontend development and AI integration, managed GitHub repositories, and coordinated project delivery.
- Marketing Team Lead –** Machine Learning Club, VIT-AP
- Marketing Head –** TEDxVITAP 2025

ACHIEVEMENTS

- National Finalist –** CTRL+SPACE Hackathon, Newton School of Technology (Team VOID ranked Top 5 nationwide)

CERTIFICATIONS

- Introduction To Python - Microsoft
- Programming in Java - Infosys
- AI Foundations Associate – Oracle
- SQL & Relational Databases - Cognitive Class
